

Is New Cops' Cap an "Umpah" Or Is It a Real Swell Bonnet?

The bowler hat, which broke the blow of the man who tried to fight the policeman, which broke the head of the officer in winter and almost caused his brains to boil in summer, today made its departure, and in its stead came the French army cap and took its place on every New York policeman's head.

The cap is liked by most of the policemen, though some of them are conservative and dislike to part with their old friends. Deputy Police Commissioner Mahon, who recommended the new cap, said that he had seen it in Paris, where he saw French Army men wearing them.

B. R. T. NOT YET ABLE TO START ITS EXPRESSES

Contractors Fail to Complete the \$2,500,000 Improvement on Time.

Contrary to expectation, the promised increase of trains on the Brighton Beach division of the Brooklyn Rapid Transit did not go into effect to-day. The management of the road has set aside the increase of the road to the date of the inauguration of the new service, after spending \$2,500,000 in shoring up the tracks and making other extensive improvements on the line.

The disappointing of the public, the B. R. T. officials declare, is not the fault of the company. The management of the road has set aside the increase of the road to the date of the inauguration of the new service, after spending \$2,500,000 in shoring up the tracks and making other extensive improvements on the line.

Make a New Promise.

The promised, however, having unforeseen obstacles, to have things in such shape that the new timetable can be operated beginning Nov. 26. The B. R. T., therefore, announced to-day that the new service would positively go into effect on that date.

The completion of the work along the Brighton Beach railroad to the ordinary traveler appears to be in a hopelessly chaotic state. The contractors, however, declare that everything is progressing satisfactorily and that they will have a double line in operation by Decoration Day, with a promise of a four-track road by the end of summer.

The old Brighton Beach line is depressed as far as Church avenue, where it crosses the surface and continues at grade to the end of the line. The work now being carried on will continue the line from Church avenue to the new terminus, where the line will be at grade to the end of the line. The work now being carried on will continue the line from Church avenue to the new terminus, where the line will be at grade to the end of the line.

Invaded Back Yards.

The B. R. T. has had great difficulty in operating its trains ever since the work was commenced. At the beginning, it was necessary to move the tracks westerly upon private property. Then the contractors took possession of the back yards abutting the south-bound track and began the work of building a heavy concrete retaining wall.

When this work was well toward completion, the contractors began digging one side of the trench through which the trains will run. Meanwhile, the road has been operating on the old tracks, and the contractors have been working on the new tracks. The contractors have been working on the new tracks, and the road has been operating on the old tracks.

BLAZE PUT IT UP TO FEUD OF FORCES

Fire-Police Difficulty Tested by Flames in Precinct Station and Was Wiped Out.

To cement the treaty of peace just made between the Police and the Fire departments of the city, and to show that the men of the two branches of New York's protective service are the best of friends, a fire started early to-day in the East One Hundred and Fourth Street Police Station, and an alarm was instantly sent to Engine Company No. 63, next door.

The firemen responded with an alacrity born of a due admixture of duty and brotherly love. They found that a hot air register was smoking. Boring a hole in the wall, they found the trouble to be a defective register and soon deluged it with water. When the blaze was extinguished the men of the two departments shook hands and declared they would fight by each other's side through smoke and plain drums and fire and highway robbers till the crack of doom.

The prisoners in the station house knew nothing of the blaze, and had no opportunity to shriek with fear of death in a horrible form, "like rats in a trap."
